Thank you for sending the response, Tamara. I am extremely disappointed but not at all surprised considering the review committee was largely the same group of individuals who approved this pornographic content in the first place. It's like asking a group of white supremacists to review their racist policies and see if they may be too racist. It does nothing to have the same group of people review policies that they themselves have previously approved.

Unfortunately this is not the end. It does not end with a group of librarians who have proven that they are incapable of discerning what is appropriate and protecting our children from harmful pornographic material.

Thank you again for being prompt with the flow of information.

Tom
